

SAVE ON ENERGY PROFESSIONAL DEVELOPMENT FOR MUNICIPAL FACILITIES PROFESSIONALS

Save on Energy provides training incentives for professionals who manage or operate municipal facilities to develop energy-efficiency expertise and improve their buildings' performance. Courses can be taken individually in any order, or as a sequence, depending on your experience/expertise.

LEARNING OBJECTIVES

How can I address complaints about heating/cooling, odours, air and water pressure, and reduce energy costs?

How can I safely reset my ventilation system to match the needs of current building occupants?

What tools can I use to visualize and present my building's energy performance?

How can I fix persistent water pressure issues?

How do I transition my growing expertise into a career in energy management?

RECOMMENDED TRAINING

ADVANCED EXISTING BUILDING COMMISSIONING

Optimize system performance to match the way your building is used today. Understand the existing building commissioning process and what to ask from your provider to get the most value from the process.

HVAC OPTIMIZATION FOR HIGH-PERFORMANCE SUSTAINABLE BUILDINGS

Identify the key roles for facilities managers, operators and tenants to ensure efficient operation of buildings year round.

INTRODUCTION TO RETSCREEN EXPERT

Learn basic energy performance monitoring and analysis techniques for buildings and industrial facilities.

PUMP SYSTEMS MATTER: PUMP SYSTEM OPTIMIZATION

Achieve efficient and reliable performance, keeping maintenance costs down – and profits up.

CERTIFIED ENERGY MANAGER

Become certified to design and lead energy management plans for large facilities and organizations.
